DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to a semiconductor device, classified in class 257, subclass 295.
- II. Claims 6-14, drawn to method of manufacturing the device, classified in class 438, subclass 3.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and I are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case, instead of forming a hollow in a surface of the insulation film, it would be possible to form the walls around a removable mask.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Gerald Bodner on 3/2/01 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2814

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wai-Sing Louie whose telephone number is 703-305-0474. The examiner can normally be reached on Mon-Fri 7:30 to 4:00.
